

**Your Tyco train set can be
just the beginning.
The beginning of
years of enjoyment
and pleasure.**

Welcome to the world of HO model railroading! It can be so much more than the train set you start with.

An HO train is something you grow with. And that grows with you. It's your first entry into a whole world of fun, excitement and action. And Tyco brings you all the things that make this world complete.

The pictures on these two pages give you some idea of what's in store for you.

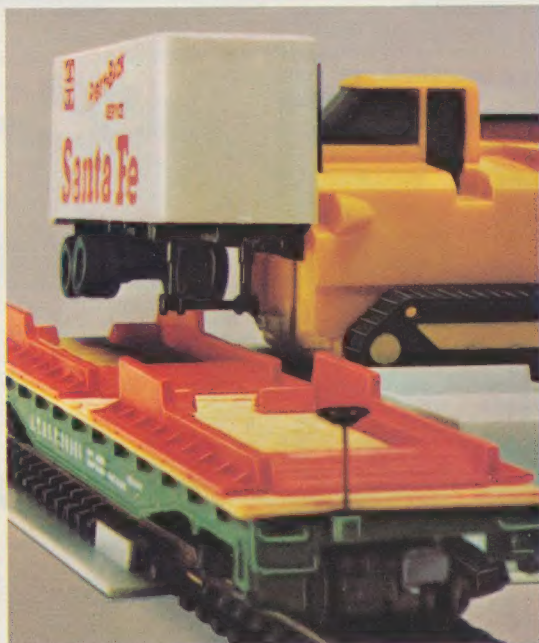

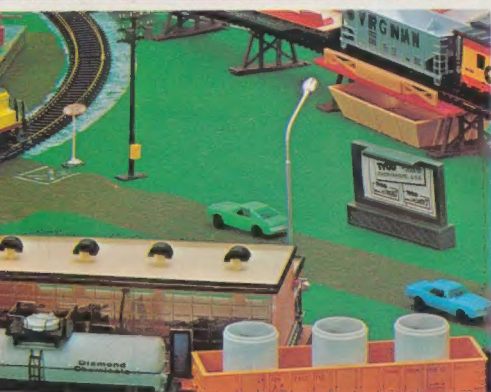

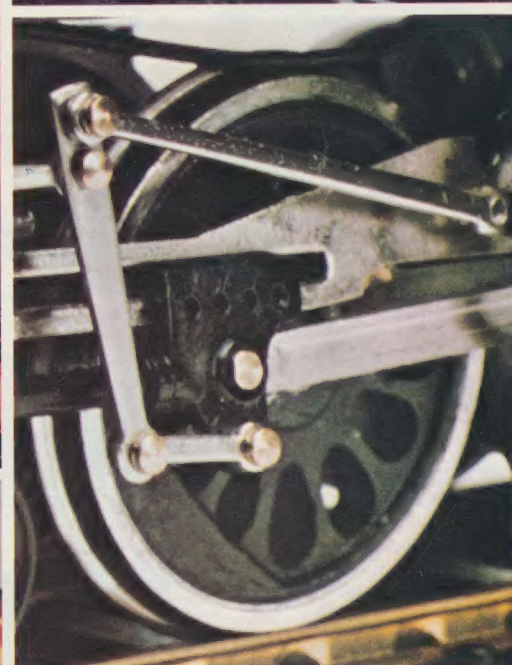

Operating Tyco electric trains is great fun for all ages, because there's plenty of action! You're the engineer—controlling the speed and direction, switching the cars onto a siding, uncoupling cars, or unloading freight—all by remote control! You can start with a small layout, in very little space... then add switches, more track, and accessories, later to expand your layout, for even more fun and realism.

You can keep on building a bigger and better railroad with Tyco, year after year. And, look at Tyco's true-to-blueprint detail. Look at the way Tyco equipment is built—and operates. Tyco makes your layout come alive!

As the leader in model railroading, Tyco offers a wide range of precision-engineered, quality-tested equipment—separate locomotives, freight and passenger cars, operating and trackside accessories, lighted fully-decorated buildings, track, and switches.

Your Tyco electric train can just be the beginning of a lasting and satisfying hobby—model railroading. For years of fun for the whole family, grow with Tyco.

LAYOUT EXPANDER SYSTEM

With Tyco's Layout Expander System you can build this exciting Railroad Empire in 4' x 8' of space—and—you can do it in easy stages—Each component is available individually. Every component is performance matched to the layout.—The more you add—the more fun you have. With the complete Layout Expander System, you can operate up to four trains. (You can control two trains at a time independently, and you can switch any of the four trains among any of the three mainline tracks. You have remote control switching, blocking and uncoupling—unload freight—logs, ore, crates, pipe by remote control.—Even a piggyback trailer. The easiest way to start your Railroad Empire is with the Track Layout Expander (Stock #7901). Here in one package is everything you need to expand any circle of track to a 4' x 8' double oval track layout, wired for 2-train operation (one train at a time with a single power pack). The Instruction Manual is included.

32-page layout expander manual contains step by step instructions with easy-to-follow diagrams and illustrations. You can obtain it at your Tyco dealer. Or send one dollar to Tyco Customer Service, Moorestown, New Jersey 08057.

You'll also enjoy the competition and excitement of Tyco Pro home Racing.

Now you can enjoy the thrills of racing in your own home, with Tyco Pro Racing—the world's finest home racing system.

You are the driver with Tyco Pro Racing, the closest thing to real racing...in miniature. You control the speed and handling of Tyco Curvehuggers—the finest miniature racing cars. Go wide open down fast straightaways, then slow down around hairpin curves. Curvehuggers give you that extra margin of dependable traction in the curves.

You grow with Tyco Pro Racing. Start with any set, then add on. Lengthen the straights for all-out speed. Add more curves to build challenging new layouts. Add a Tyco automatic lap counter, or a 40° hi-banked curve that lets you drive through at full speed.

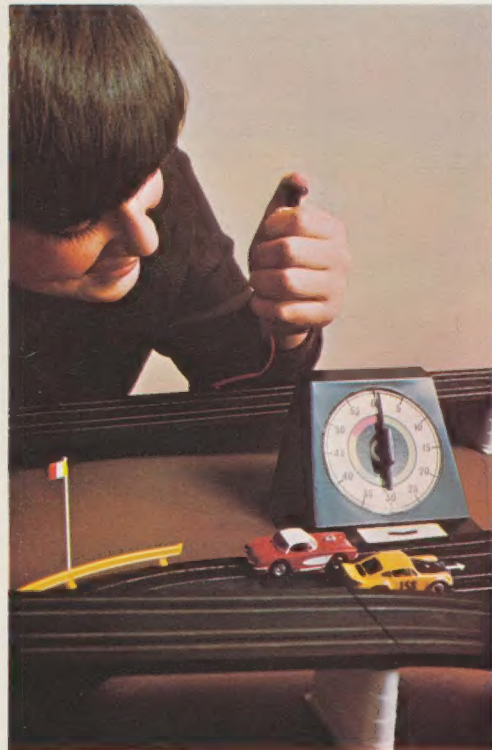

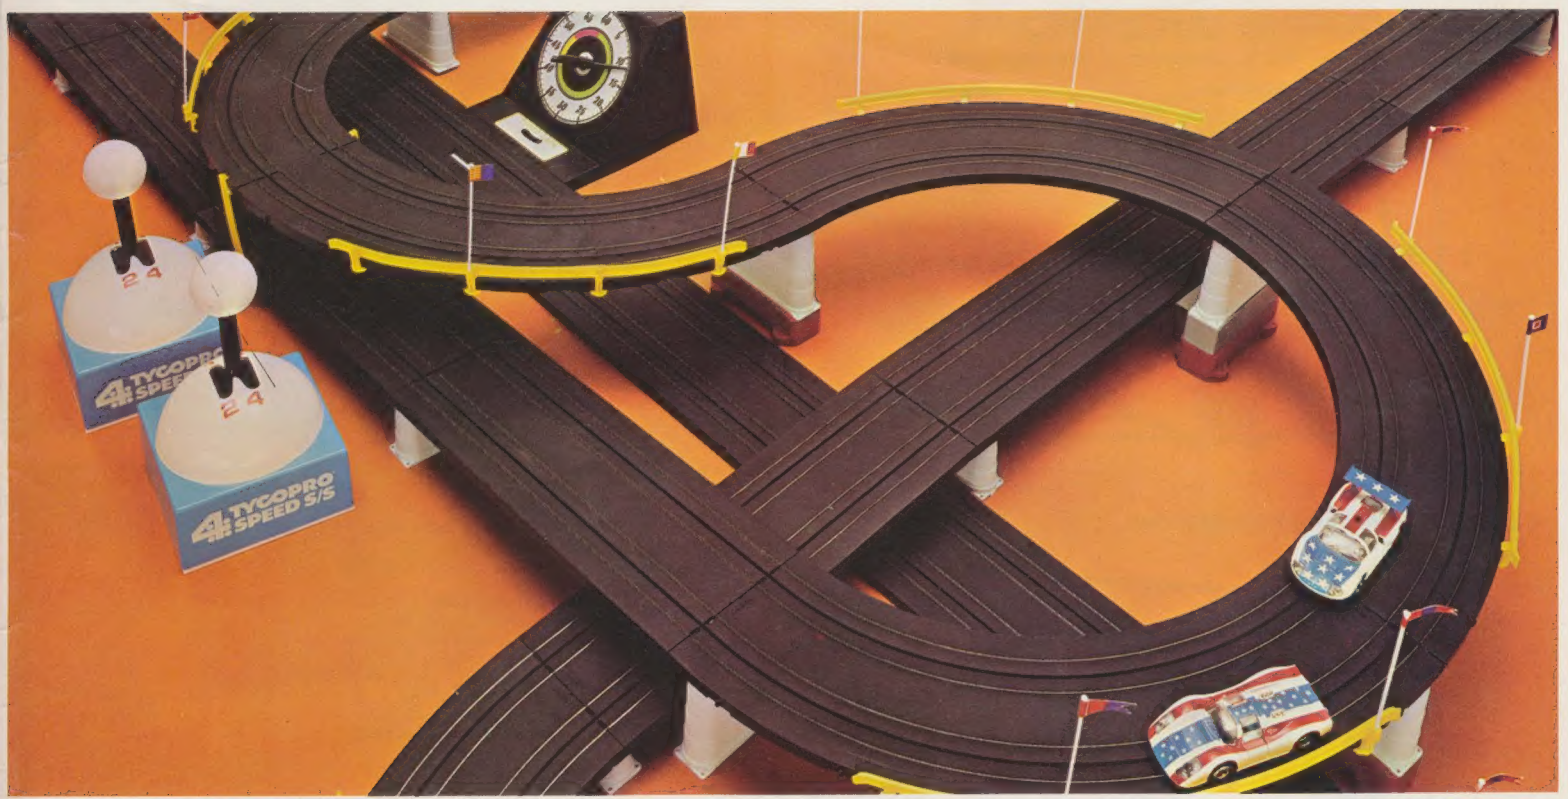

You set up any track layout quickly and easily with exclusive Tyco-Lok track. It snaps together or apart with a simple sideways motion. Set up hundreds of different track layouts in little space.

And Tyco's exclusive Curvehugger cars have been engineered for top performance. They operate on all HO track. They corner faster because they really hug the track.

You can win with a Curvehugger car on your friend's layout as well as your own.

Every Tyco Pro Racing set is complete with two total-performance Curvehugger cars, two instant-response racing controllers, electric power pack and track. For real racing action in miniature, step up to the all-electric Pro Racing System—step up to Tyco.
